Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kaufman et al.

Kaufman et al teaches an apparatus and method for controlling ion generation in an ion source (Col. 11 Lines 15-21) comprising a filament cathode (46), a mirror electrode (106), an ion precursor gas (40), a grid means (88, 90) and means (56, 94, 104, and 108) for controlling the potentials of the filament-cathode, grid, and mirror electrode to control the electron population and ion generation (Col. 6 Line 47 through Col. 7 Line 60) where the position and size of the grid apertures are also selected to control electron and ion populations (Col. 9) as recited in claims 1-3, 7-9, 13, 17, and 20.

Regarding claims 4-5, 10-11, 15-16, and 18-19, Kaufman et al. teaches at Col. 7 Line 11 that directly or indirectly heated cathodes may be used.

Allowable Subject Matter

Claims 6, 12, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2881

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or suggest any response time for varying the intensity of the ion beam as recited in claims 6, 12, and 14. A response time of less than one millisecond is not taught or suggested in the prior art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A Vanore whose telephone number is 703-306-0246. The examiner can normally be reached on M-F 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Lee can be reached on 703-308-4116.
